

New York University College of Dentistry  
Linhart Continuing Dental Education Program

“Current Concepts in American Dentistry”  
WRITTEN TOPIC REPORTS

Written reports must be typed and should be approximately twenty (20) to twenty-five (25) pages in length. A bibliography must be included. Participants will be given five (5) to ten (10) minutes to discuss their findings. Do not read the report; teach what you have learned. Participants are required to bring three (3) copies of their final report.

**Please Print Clearly:**

NAME: \_\_\_\_\_  
(Print your name exactly how you would like it to appear on your NYU completion certificate)

ADDRESS: \_\_\_\_\_  
\_\_\_\_\_

CITY: \_\_\_\_\_ COUNTRY: \_\_\_\_\_

TELEPHONE: \_\_\_\_\_ FAX: \_\_\_\_\_ E-MAIL: \_\_\_\_\_

ANTICIPATED PRESENTATION DATE: \_\_\_\_\_

In order to receive the Current Concepts in American Dentistry@ international advanced education certificate, participants must complete five (5) sessions of which at least three (3) sessions must be completed in New York City. Please indicate the sessions completed below.

	<u>Dates</u>	<u>Location</u>	
Session #1	_____	<input type="radio"/> Abu Dhabi	<input type="radio"/> Other _____
Session #2	_____	<input type="radio"/> New York City	<input type="radio"/> Other _____
Session #3	_____	<input type="radio"/> New York City	<input type="radio"/> Other _____
Session #4	_____	<input type="radio"/> Abu Dhabi	<input type="radio"/> Other _____
Session #5	_____	<input type="radio"/> New York City	<input type="radio"/> Other _____

## IMPLANTOLOGY TOPIC REPORTS

1. Classification of Implant Complications Leading to Early Failure
2. Distraction Osteogenesis
3. Anatomic Considerations Related to Implants
4. The Rationale for CAT Scans
5. Classification of Bone Density
6. The Role of Attached Gingiva with Implants
7. Common Pharmacologic Considerations in Implant Surgery
8. Soft Tissue Management During Implant Surgery
9. Socket Wound Healing
10. Advantages/Disadvantages of Hydroxylapatite Coatings for Implants
11. Guided Tissue Regeneration in Implant Therapy
12. Bone Augmentation Considerations
13. Single Tooth Implant
14. Esthetic Considerations for Implant Restorations
15. Biomechanical Aspects of Implant Dentistry
16. Treating Ailing and Failing Implants
17. Use of Resorbable versus Non-Resorbable Membrane
18. Immediate versus Delayed Socket Implant Placement
19. Template Designs
20. Pros and Cons of Sinus Lifts on Implant Treatment
21. Biological Width
22. Screw Retained versus Cement Retained Restorations
23. Bone Grafts in Extraction Sockets
24. Implant Surfaces
25. Submerged versus Non-Submerged Implant Therapy
26. Immediate Loading
27. Stage II Surgery
28. Early Crestal Bone Destruction Around Implants
29. One-Stage Implants Versus Two-Stage Implants
30. Considerations for Sinus Augmentation or Ridge Augmentation Versus Short Implants
31. Computerized Surgical Guides
32. Maintenance of Dental Implants
33. Occlusal Considerations for Implant Supported Protheses
34. Other: \_\_\_\_\_

## PERIODONTOLOGY TOPIC REPORTS

1. Periodontal Pathology
2. Microbiology Associated with Periodontal Disease
3. Periodontal Anatomy
4. Periodontal Evaluation
5. Pregnancy and Periodontal Disease
6. Initial Therapy: Scaling and Root Planning
7. Gingivectomy
8. Osseous Surgery
9. Tuberosity and Retromolar Surgery
10. Treating Teeth with Furcation Involvement
11. Guided Tissue Regeneration
12. Bone Grafts
13. Surgery for Anterior Esthetics
14. Synthetic Bone Grafting Materials
15. Occlusion and Periodontal Disease
16. Periodontal Splinting
17. Periodontal Maintenance
18. Etiology of Periodontal Disease
19. Periodontal Prosthetics
20. Free Gingival Grafts
21. Pedical and Sliding Grafts
22. Rationale for Increasing the Zone of Attached Gingiva
23. Apically Positioned Flaps
24. Open Flaps Curettage and the Modified Widman Procedure
25. Bone Morphogenic Protein
26. Classification of Periodontal Diseases
27. Root Surface Conditioning Prior to Grafting and Guided Tissue Regeneration
28. Oral Medicine - Lesions
29. Surgery for Anterior Esthetics
30. Other: \_\_\_\_\_

## **COSMETIC/AESTHETIC TOPIC REPORTS**

1. Home bleaching
2. Office bleaching
3. Soft tissue effects of bleaching
4. Bonding agents
5. Advantages/disadvantages of bleaching
6. Bonding to glass ionomers
7. Bonding to metal
8. Bonding to porcelain
9. Esthetics of color
10. Composite resins for posterior restorations
11. Color management of crowns
12. Esthetic considerations in porcelain veneers
13. Etching for porcelain bonding
14. Advantages/Disadvantages of inlays and onlays
15. Cosmetic clinical photography
16. Placement of porcelain veneers
17. Computer Applications in smile Analysis
18. Impression techniques
19. Color management
20. Other: \_\_\_\_\_
