Area of interest:
General Dentistry

AED 3,000
$ 816

Dr Eduardo Mahn, Chile

Dr Mahn is presently the Director of Clinical Research and the Director of the Program of Esthetic Dentistry at the Universidad de Los Andes, Chile. He is also a partner at the CIPO Clinic in Santiago, Chile, emphasizing comprehensive implantology, restorative and aesthetic dentistry.

Course Objectives

- The potential, advantages and disadvantages of direct composites
- To differentiate which cases are suitable or not for the injection technique
- How to prepare teeth previous to composites
- How to make correctly all kind of indications for direct restorations
- How to build a matrix, inject the composite and cure it
- The classic analogue and the digital modification for posterior as well as for anterior teeth
- The simple way, the layering modification and the “Crystal Shell” technique

Course Description

The course will cover the necessary knowledge to master anterior and posterior direct techniques. First, the participants will evaluate the model and plan how to prepare the anterior teeth. Afterwards, they will prepare the teeth and then they will have to restore them with different techniques, depending from the indication.
