Immediate esthetic restorations for anteriors – from diastemas closure, fractured tooth restoration to composite veneers

HANDS-ON TRAINING

Asst Prof Dr Phophi Kamposiora, Greece

DDS, MSc, PhD, FICD.

7CE
Credits

DATE:
09 September 2022 | 09:00 - 18:00

LOCATION:
CAPP Training Institute | Dubai | UAE

TARGET AUDIENCE:
General Dentistry, Cosmetic Dentistry, Prosthodontics, Restorative Dentistry

Abstract

Immediate aesthetic restorations have been at the center of dental clinical practice for several years now. Factors, including the transformation of social patterns, immediate communication through social media, as well as the modification of aesthetic standards, have led to a steady increase in the interest of dental patients in aesthetic restorations. The ability of clinical dentists to provide immediate aesthetic restorations, expands patients trust, becoming a significant practice management tool.

This presentation and workshop will enable the clinician to get acquainted with the constantly changing environment of the aesthetic rules. It will focus on the characteristics and use of the most modern materials and techniques for the creation of immediate esthetic restorations for anterior teeth. Although the philosophy of the layering techniques will be presented, the aim of the presentation will be the use of simplified techniques, providing life-looking results. Intraoral scanning, tooth modification using Digital Smile Design (DSD) and the use of matrices made on printed models, will help to simplify and expedite the restorative process.

In the extensive workshop, the participants will create matrices for different clinical procedures. Subsequently, they will use these matrices in conjunction with modern restorative materials, in order to produce several anterior esthetic restorations, including teeth with different types of fractures, closure of diastemas and composite veneers.

Different marketing strategies for the integration of such restorations, as well as indirect polymer restorations in any clinical practice, will be presented throughout the lecture.

In conclusion, the ultimate purpose of the seminar is to integrate modern methods and materials with knowledge and respect to the biology of the oral cavity.

Learning Objectives & Outcomes

- To recognize and reproduce esthetic rules for immediate anterior restorations.
- To distinguish among modern esthetic materials and their use for specific immediate restorations.
- To be able to create and use various matrices for esthetic restorations.
- To be able to develop various types of esthetic anterior restorations.
- To use simplified methods in order to achieve predictably esthetic results.

Agenda

09:00 – 11:00	Lecture: Creating anterior immediate restorations using analog and digital solutions
11:00 – 11:30	Coffee break
11:30 – 12:00	Hands-on: Introduction and creation of different matrices
12:00 – 13:30	Hands-on: Restoration of fractured teeth using incremental build-up techniques
13:30 – 14:30	Lunch
14:30 – 16:00	Hands-on: Restoration of a tooth with immediate composite veneer
16:00 – 16:30	Coffee break
16:30 – 17:30	Hands-on: Immediate esthetic restoration of diastemas for anterior teeth

Teaching Methods

Formal and didactic lectures, case studies and discussion.
The hands-on training session will consist of the practice of skills.
