

Flap design, suturing techniques and atraumatic extractions using piezosurgery: A sheep cadavers course

HANDS-ON COURSE

 10 December 2021
Fri | 09:00 - 18:00

 CAPP Training Institute
Dubai

Area of interest:
General Dentistry, Cosmetic Dentistry,
Implant Dentistry, Prosthodontics,
Restorative Dentistry, Periodontics

Prof Christian Pierre Makary
Lebanon

Abstract

Flap management plays a major role when performing oral surgery procedures. Choosing the proper surgical instruments is crucial in order to enable the practitioner to successfully cut, reflect and manipulate soft tissues. Proper flap design will give a complete view of the area involved in the surgery, and respecting anatomical structures and vascular supply will ensure proper and uneventful healing.

Following surgery flap repositioning and suturing is very crucial. Choosing the proper suture material and suturing technique will allow the surgeon to achieve a perfect closure of the wound thus reducing soft tissue healing complications...
